EFBW series -BiWire Ultra control panel

Eaton's new BiWire Ultra fire detection system is unlike any other standard conventional system as the panel, conventional detectors, sounders and EN54-23 approved beacons all share the same zone wiring. This delivers significant savings in both cable and installation costs without sacrificing the systems capability.

Supporting up to 52 devices per zone, all panels in the range have the facility to flash detector LED's to facilitate the location of any wiring faults.

	EFBW2ZONE	EFBW4ZONE	FFRM8ZOME
No. of zones	2	4	8
Detectors per zone	32	32	32
Maximum loading per zone	200mA	200mA	200mA
Repeater Port	✓	✓	✓

Features

- Choice of 2, 4 and 8 zone control panels
- Detectors and sounders share the same wiring
- One man test facility
- Class change input
- Interlink relay functionality for connecting 2 BiWire Ultra panels together
- Supports an expansion card for Fire Routing Equipment, Fire Protection Equipment and fire relays per zone.
- Modern and discreet enclosure

Benefits

- Tailored to the size and need of the building
- Reduced cost of installation
- Simple system testing by a single fire alarm technician
- Capability to sound class change bell in schools
- Interlink relay allows for greater system flexibility
- Comprehensive protection for safety of building occupants
- Panel not out of place in public areas

Technical specification

Code	EFBW2ZONE	EFBW4ZONE	EFBW8ZONE
Description	2 zone panel	4 zone panel	8 zone panel
Specification			
Number of Zones	2	4	8
Devices Per Zone	Max of 32 Detectors and Manual Callpoints, Zone loading cannot exceed 200mA in alarm		
Maximum Loading Per Zone	200mA		
Standby Zone Voltage	Min: 22V DC, Max	k: 24V DC	
Alarm Zone Voltage	Min: 31V DC, Max	k: 33V DC	
Fuse Protection Per Zone	250mA PTC		
End of Line Termination	EOLM-3 Only (Do not use EOLN	Л-1 or EOLM-2)	
Fire, Fault & Interlink Relay	Type: Volt-Free, Single Pole Double Throw, Rating: 30V DC, 1A, Fuse 1.1A PTC		
Auxiliary Output	V: 0V DC (Standby)/30V DC (Alarm +/-10%), Imax: 50mA, Fuse: 50mA PTC		
Class Change	Short circuit to trigger input, open circuit to clear input		
Mains rating	230V Ah +10%/-1	5% 50Hz	
Battery rating	2 x 12V 5Ah		
Changeable power fuses	Mains 1A anti surge Battery 6-3A anti surge		
Repeater Port	Yes		
Environmental			
Operating temperature	-5 °C to +40°C		
Relative humidity	93% +/-3% non-condensing		
IP Rating	IP30		
Physical			
Weight (excluding batteries)	2.25kg		
Material	PC ABS Front and	Rear	
Cabling			
Cable access	29 x 20mm drill positions Slots for rear cable entry		
Cable type	Firetuf FT120 / FP 2 core 1.5mm, 2 s per zone)	200 creened fire rated c	able, 500m (max

Standard panel connections

Dimensions

Description	Height (mm)	Width (mm)	Depth (mm)
Complete Panel	336	375	134
Backbox	273	338	88

Status indication

- . When the fire panel enters a fault condition it will turn on the General Fault indicator and the appropriate fault indicator (refer to 8 for more details). The panel buzzer will sound a slow pulsing tone.
- System Fault Severe failure of the panel, the service company must be contacted immediately.

 Parameter Fault Company in the parameter and least hand a service company must be contacted.
 - Repeater Fault Communication with a repeater panel has been lost
- 3. Battery Fault Battery voltage missing Mains Fault – Mains supply missing
- 4. Battery Failure Battery impedance failure Charger Fault – Charger voltage missing
- Sounder Fault Short circuit or open circuit condition detected on the zone will prevent the activation of sounders if fitted on that zone
- 6. FRE Fault Short circuit or open circuit condition detected on the FRE output
- 7. FPE Fault Short circuit or open circuit condition detected on the FPE output
- Detector Removed Fault A detector head has been removed Zone Fault – Short circuit or open circuit condition detected on the zone.
