BWOB series -BiWire Ultra option board

Eaton's BiWire Ultra option board is an additional daughter card that provides outputs to Fire Protection Equipment (FPE), Fire Alarm Routing Equipment (FRE) and Relays.

The FRE output is designed to activate during a fire event and is connected to phone dialers and/or Building Management Systems - the output complies with EN54-2

The FPR output is designed to activate during a fire event and when connected to an external devices drive door release mechanisms, fire screens, sprinkler systems, and gas release systems.

Zone relay contacts are volt free and do not provide any voltage. The relays are selectable to be either set to C/NO or C/NC. The zonal relays are designed to follow the fire condition of the associated zone circuits on the Main Board.
